18 March 1964

MEMORANDUM FOR: Chief, Geographic Research, ORR

SUBJECT: Report of the ADP Committee of GRA

1. The second meeting of the ADP Committee of GRA was held on 13 March 1964. The attached reports of activities in the individual divisions were given and discussed. The reporting officer described developments at U.S. Naval Oceanographic Laboratory at Suitland and GBRADA at Ft. Belvoir.

2. Two areas of future interaction were defined at the meeting. The first one is D/GC reporting. It was the consensus that any punched cards generated should use D/GL coding. The current list of base maps now prepared by the Map Library and any other specialized listings could then be produced without further change or additions. The second area concerns the decision of OCS to review the NIS Gazetteer program. It was felt that the GRA should be represented in any user group to be consulted on output. Project Pressmap in D/GC and gazetteer use in all three divisions point to the need for such consultation.

3. The education of the Committee continues. [REDACTED] was given a general briefing and toured the Machine Division and Computer Center. [REDACTED] toured the Computer Center also and, beginning 16 March, will take a 4-day Civil Service Commission course on ADP. [REDACTED] is continuing visits to nearby installations using automated mapping techniques.
